Interfaces

DCPDS - DCPS -

SLDCADA

Overview

- Initiating a personnel action
- Data flow from DCPDS - DCPS - SLDCADA
- Difference in terminology between the systems
- Reminders

Initiating a Personnel Action

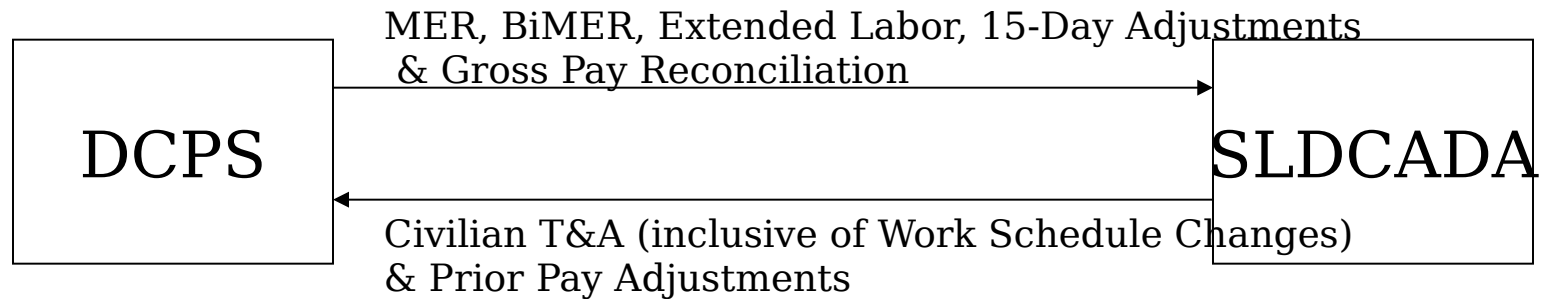

- A personnel action is initiated by an agency via a SF-52 (Request For Personnel Action)
- Information is entered into the DCPDS personnel system.
- A SF-50 (Notification for Personnel Action) is then generated to reflect the change in the DCPDS personnel system.

Items on the SF-50

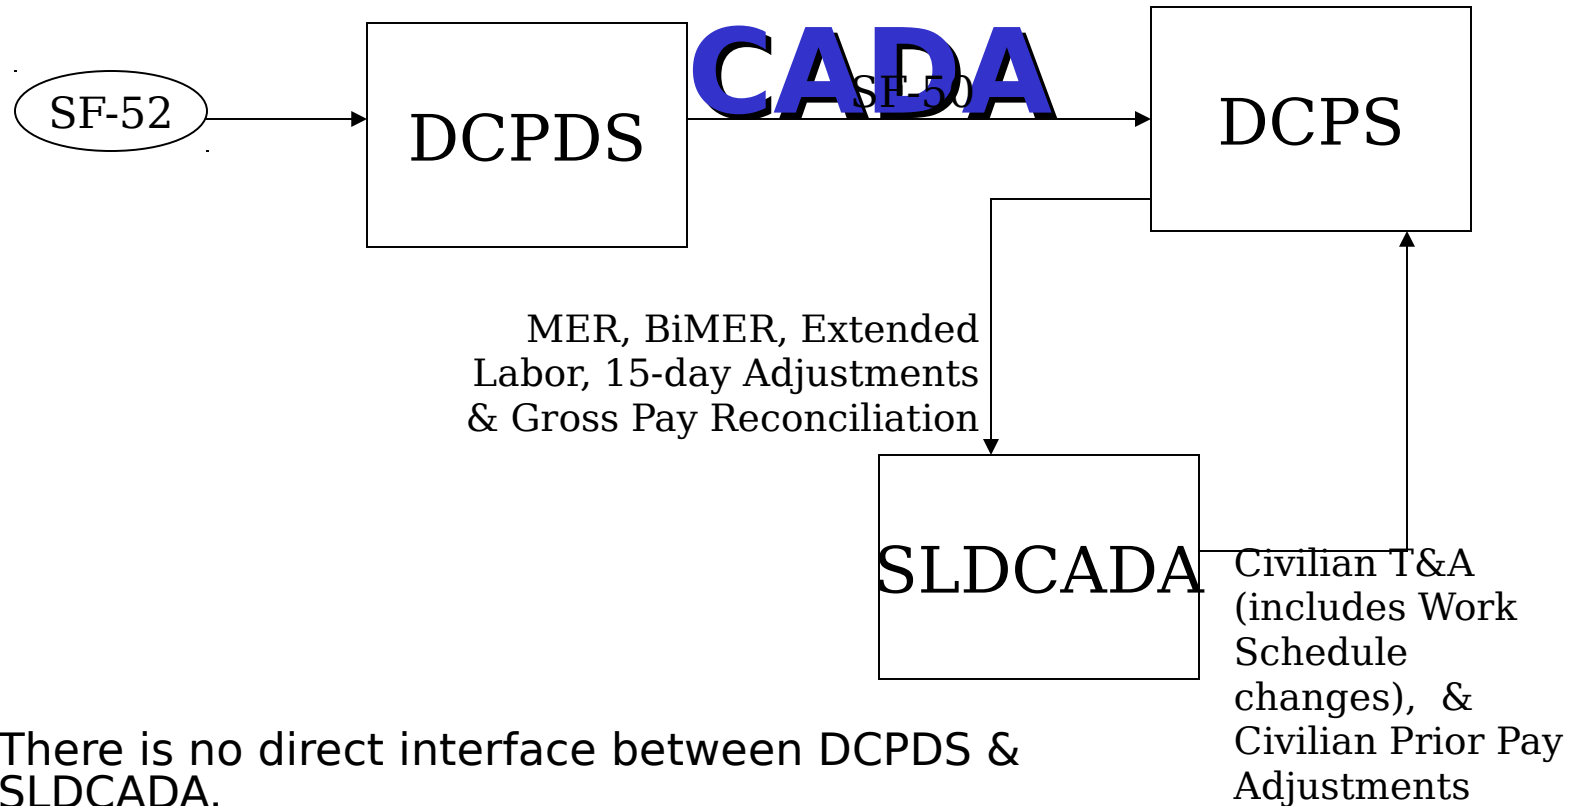

- Items included on the SF-50 that flow into SLDCADA (via the MER/BiMER) include:

Social Security Number	Pay Basis	Duty Station Code
Effective Date	Service Comp Date	UIC
Pay Plan	Work Schedule	Org Code
Occ Code	Cost Center	Step/Rate
Total Salary	FLSA Category	

DCPS - SLDCADA

DCPDS - DCPS -

- There is no direct interface between DCPDS & SLDCADA.
- Labor Extension files and Gross Pay Reconciliation from DCPS to SLDCADA are on an "as needed" basis.

Difference in Terminology

DCPDS	DCPS	SLDCADA
Cost Center	Org Code	Shop
Occ Code	Series	Occup Series
Step/Rate	Grade/Step	Pay Grade/Step
Total Salary	Annual	Salary
Pay Basis	Pay Basis	Pay Basis Code
Service Comp Date	SCD Leave	Service Comp - Leave
FLSA Category	FLSA	FLSA Indicator
UIC	Employing Activity	Employing Activity
Work Schedule	SCH	Full/Part-time
-	Tour Of Duty	Work Schedule
Duty Station Code	GLC	Geographic Location Code

Reminders

- The Shop in SLDCADA is optionally overlaid. The Employing Activity decides whether or not to overlay Shop in SLDCADA.
- Work Schedule/Tour Of Duty is not overlaid. The site maintains Work Schedules in SLDCADA. SLDCADA then passes Work Schedule changes to DCPS.

Reminders

- All other fields passed from DCPS are updated in SLDCADA.
- If you do not see a personnel change reflected in SLDCADA, back track to DCPS, then DCPDS to identify the cause.

Reminders

“All three systems need to work together for the common goal of paying employees accurately and timely.”

Status Update

Topics for Discussion

- Terminology
- NMCI Status Update
 - ✓ SLDCADA a Navy Enterprise Application
 - ✓ Upgrade Schedule
 - ✓ NMCI Rollout Issues
- NMCI Release Approval, Prioritization and Scheduling

Terminology

- FAM - Functional Area Manager
- ISF - Information Strike Force
- CTR - Contract Technical Representative
- ACTR - Assistant CTR
- UTAM - User to Application Map
- MAC - Move Add Change order
- SRM - Service Request for Maintenance
- NOC - Network Operations Center

SLDCADA

A Navy Enterprise Application

- NAVY FAM Approval for SLDCADA
- Completed installation of 98% of all SLDCADA seats to a NMCI certified application.
 - ✓ Remaining 2% are SYBASE conversions that are in the scheduling process.
- Completed 97% of all SLDCADA NMCI seats to version 21.5-03.
 - ✓ Our goal was complete all upgrades before end of FY03.

NMCI Rollout Issues

- RADIA push may cause seats with other Oracle applications to fail after rollout.
 - ✓ Developed a post-RADIA push document that we provide to NMCI ISF personnel that solves most if not all problems.

NMCI Rollout Issues

- CTR/ACTR must include a User to Application Map (UTAM) with their Move Add Change (MAC).
- The NMCI NOC will issue a Service Request for Maintenance (SRM) for MAC(s) with more than 50 users or machines.
 - ✓ It can take as long as two weeks to process a SRM.

V22 Focus

- Previous SLDCADA Web applications have taken the “like PB” approach, trying to make the functionality as much like the GUI application as possible. The main complaint with these versions is speed.
- This version breaks that mold and focuses on performance, performance, performance.

Screen Overview

The screenshot shows the SLDCADA v22.0 Pre-Release web application running in Microsoft Internet Explorer. The browser window title is "SLDCADA v22.0 Pre-Release - Microsoft Internet Explorer". The application interface consists of several key components:

- Menu Bar:** Located at the top of the application window, it includes the following items: Labor, Employee, Admin, Reference, Tools, Window, Help, Refresh, and Exit.
- Employee Access Tree:** A hierarchical tree structure on the left side of the application. It starts with a date "09/06/2003" and a "SYSTEM ADMINISTRATOR" icon. Below these are folders for "EMPLOYEES" and "TOOLS". The "EMPLOYEES" folder is expanded, showing a list of users including "ALL444CV - MOUSE MINNIE", "ALL444CV", "ALLMMMSMIL", "ANOTHER BIG TESTER", "CIV/BWEEKLY", "CMDR. MICKEY", "CMDR. MINNIE", "JOE MIMO", "MOUSE MICKEY", "MOUSE MICKEY", and "MOUSE MINNIE". Below these are several "PERSON" folders (e.g., "PERSON 01042", "PERSON 01044 - PERSON 01065", etc.) and folders for "SHOPS", "SUPERVISOR ASSIGNMENT", and "EMPLOYING ACTIVITY". The "TOOLS" folder is also expanded, showing "GROUP FILTERS" and "USER FILTERS".
- Content Area:** The large central area of the application, currently empty, where data and reports are displayed.
- Status Bar:** Located at the bottom of the application window, it displays the text "Processing row 121 of 121".
- Current User:** The username "slds1" is displayed in the top right corner of the application window.
